_____ was interviewed at his residence in _____. The following descriptive information was obtained:

Home Address: _____
Home Phone: _____
Date of Birth: _____
SSAN: _____
Employment: _____

Mr. _____ identified himself by displaying his credentials and advised Mr. _____ that the interview concerned his knowledge of the Strasburg Landfill Site. Mr. _____ also advised Mr. _____ that the U.S. Environmental Protection Agency, Region III, Philadelphia, PA had authorized the investigation.

Mr. _____ agreed to be interviewed and said that he would be willing to review this statement and, after reviewing the document for accuracy, sign the statement. Mr. _____ provided the following information:

He was employed at the Strasburg Landfill Site for one and one half years during the early 1980s, exact dates not recalled. He thinks that his paychecks were issued by Strasburg Associates. He worked as a _____. He also had other duties of a general nature such as screening dirt. Most of the material was household trash, garbage, and building materials.

In addition to the general trash and garbage, there were a "good many" 55-gallon drums brought in by several companies whose names he does not recall. To his recollection, there were no special deliveries of drums; they were mixed in with other trash. He does not recall any markings, and the drums could have been open or closed. He never examined them and could not tell if they contained anything or were empty. He did not observe any tankers, liquids, or chemicals; but occasionally, there was a "chemical" smell which was irritating to the skin and eyes. He could not relate the smell to any specific material. There were no segregated areas for burial of the drums, and they were buried at random all over the site.

Sludge was hauled in by ELDRIDGE in trucks that resembled a roll-off cut down on the sides. The sludge was dumped out of the back of the trucks. Sometimes, ELDRIDGE brought in two truck loads per day. Mr. _____ could not estimate for how long this occurred. JOSEPH BLOSENSKI also hauled in sludge at the rate of one load per day. He does not know where the sludge came from.

Delaware Container pumped out the leachate from the holding tank and hauled it away, destination unknown to Mr. _____.

At the time Mr. _____ was employed, approximately _____ employees worked at

Interview of _____ On 3/20/91 File # 91-101
Conducted by _____ Client File # T.O. C03121-01

[REDACTED]
the site. He furnished the following information on former employees:

JOHN HOFFMAN: Was superintendent of the site.
